This package contains the following products: . 9780781761451 Bruyere 100 Case Studies in Pathophysiology . 9781582557243 Porth Essentials of Pathophysiology

A full-color, case-based review of the essentials of pathophysiology--covering all major organs and systems The goal of this trusted text is to introduce you to clinical medicine by reviewing the pathophysiologic basis of 120 diseases (and associated signs and symptoms) commonly encountered in medical practice. The authors, all experts in their respective fields, have provided a concise review of relevant normal structure and function of each body system, followed by a description of the pathophysiologic mechanisms that underlie several common diseases related to that system. Each chapter of Pathophysiology of Disease concludes with a collection of case studies and questions designed to test

your understanding of the pathophysiology of each clinical entity discussed. These case studies allow you to apply your knowledge to specific clinical situations. Detailed answers to each case study question are provided at the end of the book. This unique interweaving of physiological and pathological concepts will put you on the path toward thinking about signs and symptoms in terms of their pathophysiologic basis, giving you an understanding of the "why" behind illness and treatment. Features 120 case studies (9 new) provide an opportunity for you to test your understanding of the pathophysiology of each clinical entity discussed Checkpoint questions provide review and appear in every chapter Updates and revisions throughout this new edition reflect the latest research and developments Numerous tables and diagrams encapsulate important information Updated references for each chapter topic Pathophysiology of Disease is a true must-have resource for medical students preparing for the USMLE Step 1 exam, as well as students engaged in their clerkship studies. House officers, nurses, nurse practitioners, physicians' assistants, and allied health practitioners will find its concise presentation and broad scope a great help in facilitating their understanding of common disease entities.

26 real-life cases illustrate the applications of basic immunology in clinical settings May be utilized alone or as a companion to Immunology: A Short Course, 7th Edition by Richard Coico and Geofftry Sunshine (ISBN 9781118396919) Each case study is introduced by clearly written descriptions of the major immunological disorders Full colour photographs and illustrations complement complete presentation of real data Includes complete set of problems and discussion questions for each chapter

Hematology Case Studies with Blood Cell Morphology and Pathophysiology compiles specialized case studies with specific information on various hematological disorders with Full Blood Examination (FBE or CBC), blood film images and pathophysiology of each condition. In addition, it provides basic information on how to recognize and diagnose hematological conditions that are frequently observed in the laboratory. Technicians and scientists working in core laboratories such as biochemistry labs or blood banks will find this book to be extremely thorough. Moreover, it can be used as a reference book by technicians, scientists and hematologists in every level of expertise in diagnosing hematological disorders. Includes morphology of red cells, white cells and platelets Provides images of actual blood slides under the microscope, showing the most important diagnostic features observed in each condition Presents details that are considered difficult for beginners or non-hematologists, such as specific tests and techniques Covers case studies that finish with the pathophysiology of the condition
