~~[World Bank Discussion Paper No. 322. Examines the methodologies for project evaluation that, in principle, have been adopted and stylized by the World Bank. The paper discusses the Bank's formally adopted methods and those actually practiced by Bank staff. The author attempts to put aside old discredited theories and make a start toward constructing new project selection methods that fully reflect the Bank's own characteristics, aims, and comparative advantages.](#)~~

~~[Despite the fact that three quarters of the world's poor live in rural areas, the level of international development aid directed at rural areas has continued to decline over the last decade, particularly in terms of the agricultural sector. In 2001, lending for agricultural projects was the lowest in the World Bank's history. This publication presents the World Bank's new rural development strategy based upon a results oriented approach which stresses practice, implementation, monitoring and empowerment aspects. The strategy seeks to highlight rural development efforts, focusing on the needs of the rural poor, fostering a broad-based economic growth and addressing the impact of global developments on client countries.](#)~~

~~[The sustainability of the agricultural sector worldwide is increasingly being pressurized by ecological, economic, and social developments. The Dutch government is promoting enhancing circular agriculture as an important rural development strategy in response to the challenges the sector is facing. All farmers in the country will have to be involved in closed cycles by 2030, but many farmers do not want to or cannot make this transition. This study aims to identify the different factors that influence a farmer's decision to transition towards circular agriculture. Based on thirteen semi-structured interviews with already transitioned farmers, a policy officer, a consultant, and a coordinator of a circular farmers' network, it presents an updated framework through which the linkages between different drivers and circular agriculture as a rural development strategy can be studied. This study informs policy makers, and fills a gap in literature between studies on rural development, drivers of diversification, and circular agriculture. From the results, it becomes clear that the most important incentives for farmers to actively work on closing their cycles, are the presence of a learning network, subsidies, and the personal objectives related to gaining insights into the business. Circular agriculture should not be seen as a rural development strategy per se. Many farmers do not link circular agriculture to rural development strategies, but see their business as circular by nature. It fits many different farming styles, and has the potential to contribute to sustainability in the sector as it reduces the creation of waste and need for inputs, regardless of what strategies are pursued. Further research is needed to test the framework in different contexts, and to gain a deeper understanding of the factors that withhold farmers from actively transitioning towards closed cycles.](#)~~

~~[In May 2006, the Government of the Solomon Islands placed rural development at the top of its policy agenda. The Solomon Islands Government's May 2006 Policy Framework Document places emphasis on development through a bottom-up and holistic approach that encompasses the empowerment of the people through rural advancement strategies, the pursuit of the Millennium Development Goals, the revitalization of the economy, improved law and order, effective service delivery and the devolution of powers and functions and decision-making authority to the periphery. This document comprises 4 sections: Chapter I presents a review of the current rural development situation. Chapter II discusses growth prospects and opportunities in the short to medium term \(2011 horizon\) and medium to long term \(2020 horizon\). Chapter III presents the Agriculture and Rural Development Strategy \(ARDS\) recommendations as regards priority interventions in agriculture and rural development over the short, medium and long term. Chapter IV discusses ARDS implementation, including tailoring the approach to the different provinces, monitoring ARDS implementation, and matching resources with priorities.](#)~~

Read Free Agriculture And Rural Development Strategy In Myanmar

This study analyzes the significance of new economic context in Latin America and the Caribbean for the design of policies for the agricultural sector. In addition, it analyzes and assesses recent trends in agricultural development policy in Latin America, to identify and synthesize new policy directions, and to highlight emerging challenges and avenues for policy innovation. The main conclusion of the study is that Latin American agricultural and rural development policy is at a turning point that will require bold new initiatives to improve the production performance of agriculture, reduce rural poverty, protect the natural resource base of the sector and ensure the political sustainability of economic growth. This will require a pro-active set of interventions designed at restoring the specificity of sectoral agricultural policy while maintaining consistency with the macro reforms.--Publisher's description.
