4. Charles Babbage, an Englishman, could well be called the father of computers. 5. The first computer was invented and built in the USA. 6. Instructions used by computers have always been kept inside the computer's memory. 7. Using transistors instead of vacuum tubes did nothing to increase the speed at which calculations were done.

English for computer science - Damrudi

English mathematician and inventor Charles Babbage is credited with having conceived the first automatic digital computer. During the mid-1830s Babbage developed plans for the Analytical Engine. Although it was never completed, the Analytical Engine would have had most of the basic elements of the present-day computer.
