"The rise and fall of kings and nations!"--Cover.

Andrew Hale-Byrne tells the bizarre story of how an elitist cult on Cape Cod, founded by two self-proclaimed holy women, managed to infiltrate and take over a preppy Anglican boarding school in Ontario, Canada with an international student body. This happened with patronage from the highest levels in Canada's government, political class, and business community, and in some cases included their active participation in covering up abuse. What followed were many years of institutional abuse -- psychological, physical and sexual -- of the children under the protective camouflage of Anglicanism. Andrew tells the history of the abuse victims and how he exposed the school, the cult and the Ontario establishment. The upper-crust cult on Cape Cod was a "who's who" list of the cream of society, including a Rockefeller heiress, a Chairman of the U.S. Chamber of Commerce and a Chairman of Arthur Young. It is a look inside the peculiar world of a cult at the apex of American and Canadian societies. Due to Andrew's expose the victims of abuse have been re-victimized by retaliation launched by the defendants and the corrupt Anglican hierarchy. Death threats have not intimidated Andrew from his mission and the fight for justice continues in the courts."

Attention has recently turned to using plants as hosts for the production of commercially important proteins. The twelve case studies in this volume present successful strategies for using plants to produce industrial and pharmaceutical proteins and vaccine antigens. They examine in detail projects that have commercial potential or products that have already been commercialized, illustrating the advantages that plants offer over bacterial, fungal or animal cell-culture hosts. There are many indications that plant protein production marks the beginning of a new paradigm for the commercial production of proteins that, over the next decade, will expand dramatically.

This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.
