visual changes that affect both eyes and include seeing things like: Light flashes

~~How Migraine With Aura and Ocular Migraine Differ~~

By far, the most common type of migraine aura is visual aura. Almost 90 percent of people who suffer from migraine with aura

Online Library

Migraine Auras

complain of visual aura. This type of aura, as the name implies, causes a wide variety of vision changes and visual disturbances. These visual aura symptoms typically occur right before the full-scale migraine attack begins.

~~Migraine: visual aura~~

Visual migraine symptoms typically last

Online Library

Migraine Auras

around 30 minutes or sometimes less and affect both eyes. After a visual migraine goes away there may be a migraine headache or one may not occur at all.

An Ocular Migraine Happens in Only One Eye It can be difficult to tell if you're having a visual migraine or an ocular migraine.
