What is the Difference Between a Monohybrid Cross and a ...

Monohybrid parents have only a single trait difference, when they are crossed or breed the process is so called monohybrid cross while in a dihybrid, parents have two trait difference and when they are crossed the process is dihybrid cross.

A cross involving contrasting expression of one trait is transferred to as monohybrid cross. For example, in order to learn inheritance of plant height, a tall pea plant was crossed with a dwarf one; all other traits were ignored. Inheritance of two pairs of alleles through a number of generations was studied by Mendel through dihybrid crosses.

A dihybrid cross is a cross between individuals that involves two pairs of contrasting traits. Predicting the results of a dihybrid cross is more complicated than predicting the results of a monohybrid cross. All possible combinations of the four alleles from each parent must be considered. We will examine a dihybrid cross involving both color and texture.

Main Difference – Monohybrid Cross
vs Dihybrid Cross. Monohybrid cross
and dihybrid cross are two genetic
crossing methods that are used to
study the inheritance of allele pairs.
These are useful in understanding the
inheritance of traits from one
generation to another. Monohybrid
cross is a genetic cross that involves a
single pair of genes that is responsible
for one trait.

The revised edition of this bestselling textbook provides latest and detailed account of vital topics in biology, namely, Cell Biology, Genetics, Molecular Biology, Evolution and Ecology . The treatment is very exhaustive as the book devotes exclusive parts to each topic, yet in a simple, lucid and concise manner. Simplified and well labelled diagrams and pictures make the subject interesting and easy to understand. It is developed for students of B.Sc. Pass and Honours courses, primarily. However, it is equally useful for students of M.Sc. Zoology, Botany and Biosciences. Aspirants of medical entrance and civil services examinations would also find the book
