For Ellen, Faith was nonexistent until faith was all she had to cling to. After 24 years together, life partners, Ellen and Paul were married nine months before his passing to the spirit world. When treatments ran out for Paul's dreaded health issues, he confided to Ellen that he was very tired of exotic drugs, daily doctor visits, and feeling terrible. He wanted peace and comfort. So together, they decided hospice was not the only choice but the best choice. Before making the transition to his final reward and eternity, they shared his time going over memorabilia, listening to favorite Big Band music, watching movies, laughing, and telling stories about seashells. Ellen read his Tin Can Sailor magazines aloud, and much time was spent in expressions of love. Ellen stood guard 24/7. Sadly, they were wrong to believe family and lifelong friends would be their support system. Instead, many angels in human form stepped in to give support, camaraderie, and comfort. Ellen, an outspoken believer in science, was presented numerous miracles; miracles that science could not explain. These miracles and the subtle comfort she felt through prayer led to a profound epiphany in belief. The smell of English leather permeating the night air** Paul 's brother used that brand of cologne, but he had been dead for several years. Another incident, Ellen being violently shaken awake, just in time to untangle her beloved from the blanket and side rail. No one else was in the house, so whose hand shook her shoulder? This is Ellen and Paul's intimate hospice journey. The lessons learned are being shared with the deepest of intentions of easing the load of those facing a hospice odyssey of their own.

In the New York Times bestseller Everything All at Once, Bill Nye shows you how thinking like a nerd is the key to changing yourself and the world around you. Everyone has an inner nerd just waiting to be awakened by the right passion. In Everything All at Once, Bill Nye will help you find yours. With his call to arms, he wants you to examine every detail of the most difficult problems that look unsolvable—that is, until you find the solution. Bill shows you how to develop critical thinking skills and create change, using his “everything all at once” approach that leaves no stone unturned. Whether addressing climate change, the future of our society as a whole, or personal success, or stripping away the mystery of fire walking, there are certain strategies that get results: looking at the world with relentless curiosity, being driven by a desire for a better future, and being willing to take the actions needed to make change happen. He shares how he came to create this approach—starting with his Boy Scout training (it turns out that a practical understanding of science and engineering is immensely helpful in a capsizing canoe) and moving through the lessons he learned as a full-time engineer at Boeing, a stand-up comedian, CEO of The Planetary Society, and, of course, as Bill Nye The Science Guy. This is the story of how Bill Nye became Bill Nye and how he became a champion of change and an advocate of science. It’s how he became The Science Guy. Bill teaches us that we have the power to make real change. Join him in... dare we say it... changing the world.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.
