ASP.NET Web API is a key part of ASP.NET MVC 4 and the platform of choice for building RESTful services that can be accessed by a wide range of devices. Everything from JavaScript libraries to RIA plugins, RFID readers to smart phones can consume your services using platform-agnostic HTTP. With such wide accessibility, securing your code effectively needs to be a top priority. You will quickly find that the WCF security protocols you're familiar with from .NET are less suitable than they once were in this new environment, proving themselves cumbersome and limited in terms of the standards they can work with. Fortunately, ASP.NET Web API provides a simple, robust security solution of its own that fits neatly within the ASP.NET MVC programming model and secures your code without the need for SOAP, meaning that there is no limit to the range of devices that it can work with -- if it can understand HTTP, then it can be secured by Web API. These SOAP-less security techniques are the focus of this book.

Eihei Dogen, the founder of the Japanese branch of the Soto Zen Buddhist school, is considered one of the world's most remarkable religious philosophers. *Eihei Dogen: Mystical Realist* is a comprehensive introduction to the genius of this brilliant thinker. This thirteenth-century figure has much to teach us all and the questions that drove him have always been at the heart of Buddhist practice. At the age of seven, in 1207, Dogen lost his mother, who at her death earnestly asked him to become a monastic to seek the truth of Buddhism. We are told that in the midst of profound grief, Dogen experienced the impermanence of all things as he watched the incense smoke ascending at his mother's funeral service. This left an indelible impression upon the young Dogen; later, he would emphasize time and again the intimate relationship between the desire for enlightenment and the awareness of impermanence. His way of life would not be a sentimental flight from, but a compassionate understanding of, the intolerable reality of existence. At age 13, Dogen received ordination at Mt. Hiei. And yet, a question arose: "As I study both the exoteric and the esoteric schools of Buddhism, they maintain that human beings are endowed with Dharma-nature by birth. If this is the case, why did the buddhas of all ages - undoubtedly in possession of enlightenment - find it necessary to seek enlightenment and engage in spiritual practice?" When it became clear that no one on Mt. Hiei could give a satisfactory answer to this spiritual problem, he sought elsewhere, eventually making the treacherous journey to China. This was the true beginning of a life of relentless questioning, practice, and teaching - an immensely inspiring contribution to the Buddhadharma. As you might imagine, a book as ambitious as *Eihei Dogen: Mystical Realist* has to be both academically rigorous and eminently readable to succeed. Professor Hee-Jim Kim's work is indeed both.
