Directors of Product Development, VPs of R&D, and Innovation Consultants should have this book on their shelves! Dr. Brian Glassman, a Ph.D. in Innovation Management from Purdue University, provides a detailed an authoritative review of the front-end of innovation, idea generation, and idea management. Plus, his seminal process model, explained in detail, provides innovation practitioners a framework with which to generate ideas in a controlled manner, and then capture, screen, store, a diffuse those ideas throughout their enterprises. This powerful model can employ the best idea generation methods, such as Blue Ocean Strategies, IDEO, TRIZ, and more; resulting in a steady stream of disruptive to incremental ideas for new products and services. This seminal work is highly authoritative and separates itself from the rest of the innovation literature by providing insights cited by highly creditable sources, and by providing structured arguments based on data driven research.

This book analyses prevailing approaches and policies in innovative entrepreneurship. It explores the ways in which entrepreneurs learn and develop innovation-based businesses to drive increased regional competitiveness. Specifically, the contributions propose that sustainable innovation ecosystems booster innovative entrepreneurship and thus create a competitive advantage for smart and sustainable growth. It also examines the current state of entrepreneurship education, where the development of entrepreneurial abilities is considered a process of value creation—both economic and social—with the final aim to create both new start-ups and entrepreneurial mind-sets. Featuring theoretical approaches and empirical evidences, this title is appropriate for scholars, academics, students and policy makers in technology and innovation management, economics of innovation and entrepreneurship.
