"A Mother's Journey: Through Laughter and Tears" is a book that will inspire, encourage, and validate all mothers who have the important job of raising the wonderful children that God has blessed us all with. The author's humorous writings teach us to be able to laugh at life's little tragedies, as we remember that we are not alone in our journey. Motherhood is a shared voyage, the commonalties of which span all ages and all women throughout the world! Kimberly Garrow creatively reminds us that we are together in this beautiful journey called motherhood. The stories in this book will make you laugh and will tug at your heart. The author understands a woman's heart, in relation to preconception, pregnancy, and being a new mom; the whole journey in between and beyond is beautifully captured in the pages of this book. Reading Kimberly's book is like taking a trip through your own life as a mother, whether you are just contemplating becoming a mother, whether you are a mom, or whether you are now enjoying your children's children. Every reader will relate to Kimberly Garrow's cleverly written stories and poems, as well as the underlying emotions and strengths captured throughout this book. This book is a celebration of mothers everywhere! Enjoy the journey!

This report summarizes the results of an ambitious three-year ethnographic study, funded by the John D. and Catherine T. MacArthur Foundation, into how young people are living and learning with new media in varied settings -- at home, in after school programs, and in online spaces. It offers a condensed version of a longer treatment provided in the book *Hanging Out, Messing Around, and Geeking Out* (MIT Press, 2009). The authors present empirical data on new media in the lives of American youth in order to reflect upon the relationship between new media and learning. In one of the largest qualitative and ethnographic studies of American youth culture, the authors view the relationship of youth and new media not simply in terms of technology trends but situated within the broader structural conditions of childhood and the negotiations with adults that frame the experience of youth in the United States. The book that this report summarizes was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California. John D. and Catherine T. MacArthur Reports on Digital Media and Learning

The Evolution of the Immune System: Conservation and Diversification is the first book of its kind that prompts a new perspective when describing and considering the evolution of the immune system. Its unique approach summarizes, updates, and provides new insights on the different immune receptors, soluble factors, and immune cell effectors. Helps the reader gain a modern idea of the evolution of the immune systems in pluricellular organisms Provides a complete overview of the most studied and hot topics in comparative and evolutionary immunology Reflects the organisation of the immune system (cell-based, humoral [innate], humoral [adaptive]) without introducing further and misleading levels of organization Brings concepts and ideas on the evolution of the immune system to a wide readership

Summary Online recommender systems help users find movies, jobs, restaurants-even romance! There's an art in combining

statistics, demographics, and query terms to achieve results that will delight them. Learn to build a recommender system the right way: it can make or break your application! Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Recommender systems are everywhere, helping you find everything from movies to jobs, restaurants to hospitals, even romance. Using behavioral and demographic data, these systems make predictions about what users will be most interested in at a particular time, resulting in high-quality, ordered, personalized suggestions. Recommender systems are practically a necessity for keeping your site content current, useful, and interesting to your visitors. About the Book Practical Recommender Systems explains how recommender systems work and shows how to create and apply them for your site. After covering the basics, you'll see how to collect user data and produce personalized recommendations. You'll learn how to use the most popular recommendation algorithms and see examples of them in action on sites like Amazon and Netflix. Finally, the book covers scaling problems and other issues you'll encounter as your site grows. What's inside How to collect and understand user behavior Collaborative and content-based filtering Machine learning algorithms Real-world examples in Python About the Reader Readers need intermediate programming and database skills. About the Author Kim Falk is an experienced data scientist who works daily with machine learning and recommender systems. Table of Contents PART 1 - GETTING READY FOR RECOMMENDER SYSTEMS What is a recommender? User behavior and how to collect it Monitoring the system Ratings and how to calculate them Non-personalized recommendations The user (and content) who came in from the cold PART 2 - RECOMMENDER ALGORITHMS Finding similarities among users and among content Collaborative filtering in the neighborhood Evaluating and testing your recommender Content-based filtering Finding hidden genres with matrix factorization Taking the best of all algorithms: implementing hybrid recommenders Ranking and learning to rank Future of recommender systems
