IEC 60601-1-2:2020 (ed 4.1) - The Changes | EMC Technologies

In IEC 60601, the test requirements for electrical leakage must be carried out under the worst possible conditions to ensure absolute safety. This is achieved using an elevated mains at 110% of the highest expected voltage (i.e. at 240V mains this would mean testing at 264V).

Preconditioning of the medical equipment is required prior to testing.
