The Sense of Dissonance Accounts of Worth in Economic Life Search is the watchword of the information age, but in this study of innovation David Stark examines a different kind of search - when we don't know what we're looking for but will recognize it when we find it. Drawing on John Dewey's notion of collaborative inquiry, Stark uses ethnography to study the perplexing situations in which actors search for what's valuable.

What counts? In work, as in other areas of life, it is not always clear what standards we are being judged by or how our worth is being determined. This can be disorienting and disconcerting. Because of this, many organizations devote considerable resources to limiting and clarifying the logics used for evaluating worth. But as David Stark argues, firms would often be better off, especially in ...
