SOLUTIONS TO PROBLEMS. 2.1 (i) Income, age, and family background (such as number of siblings) are just a few possibilities. It seems that each of these could be correlated with years of education. (Income and education are probably positively correlated; age and education may be negatively correlated)

Introductory Econometrics: A Modern Approach

Define a new variable, act_{miss} , which equals one if act is missing, and zero otherwise. (ii) Create a new variable, say act_o , which is the act score when act is reported and zero when act is missing. Find the average of act_o and compare it with the average for act . (iii) Run the simple regression of score on act using only the complete cases.
